Hotel Sub-committee report March 25, 2002

The following were discussed and proposed by the members:

1) Proposed hotel survey: The entire document as a resource book/guide.

2) Florida specific checklist: Checklist to be formatted like the ADA Barrier Removal Checklist integrating Florida requirements into this document.

3) Clarify and refine: Further discussion relative to how this should be done.

4) Document to be included within rule making\statute. Al Bragg suggested we take this through the rule making process and his suggestions resulted in a unanimous "Aye." Further discussion by the committee on the following: How this document could actually be used and unless it is in statute, how can we force hotels to use it?.
It should be noted that the sub-committee requests more time to complete their work product in the future. The ½ hour session was somewhat wasted, as we were all over the place - the next paragraph explains.
"One hour has been requested on the agenda for the next meeting. I was thrown this last meeting b/c, the meeting before we did not hold the hotel sub-committee and the meeting before that I did not attend. Johnny sat as Chair and I was told at this last meeting that he had guided the committee to expand our original goal of developing a working list for our group only, to a working document that could be used statewide. Thus, I was unprepared for the ½ hour session. I will try to get an agenda together for the packet - if not, I will have one put together to be passed out at the meeting".
