**Subject:** Mods S9851 and S10090

Good afternoon, Mo.

I will be traveling on the 16th and will not be able to attend the meeting in person, so I wanted to share for the record that, Leading Builders of America (LBA) fully supports the work led by the FHBA and others developed to address the issues that have been created by S9851 and S10090. LBA believes the proposed changes are the appropriate way to resolve the concerns of the original proposals particularly regarding cost implications. I would appreciate your sharing LBA's support for the revised language with the Commission.

Best regards,  
Amanda

Amanda Hickman
