

## **Cost of Compliance:**

**Issue 1:** The cost estimates to replace 6 interior doorways for accessibility compliance is \$3,240 (Redden) or \$2,970 (Giardina).

**Issue 2:** For the two small bathrooms, I have two choices.

(1) Call the two bathrooms “storage” and either cap off the plumbing or put a permanent wall up in place of the doors. The cost estimates for this are: \$1,900 or \$2,900 (Redden) or \$2,090 or \$3,190 (Giardina). (NOTE: Needless to say, this not only destroys even more of the uniqueness of this older building, but it takes away two additional bathrooms that are of use now. Plus, if there was a desire in the future to restore it to bathrooms, it would cost even more.)

(2) Decrease the space in the two private offices and renovate the two bathrooms to make them accessible. The cost estimates for this are: \$9,275 (Redden) or \$10,202 (Giardina).
