

**10. Licensed Design Professional:** Where a licensed design has designed the project, his or her comments **MUST** be included and certified by signature and affixing of his or her professional seal. The comments must include the reason(s) why the waiver is necessary.

We are requesting waiver from the minimum clear door opening of 32" for the doors leading into the three small tutoring spaces, the break room, and two of the four office/tutoring spaces. In addition, we are requesting waiver from the accessibility requirement for the small existing bathrooms within the two office/tutoring spaces that do not have accessible entry. The functions that take place in the proposed inaccessible spaces are available in the accessible areas, with the exception of the drinking fountain. The workings of this facility are such that the public is assisted by staff, that will bring cups of water to the public being served at any time.

This waiver is necessary because following the literal interpretation is not necessary for this facility to fully meet the needs of the public, and the additional cost of these upgrades is disproportionate to the overall cost and would create a financial hardship.
