RE: Chair Lift

Our new facility, located at 688 SW Whitmore Dr., is private facility that has less than three stories and less than 3000 square feet per story. The entire building has been designed and built for our company to solely occupy. The second floor is strictly designated, as an area for owners only, with two offices, a bathroom and a breakroom. The two doors at the base of the stairwells are keyed differently than all others doors in the facility. This was specifically to restrict access, off limits to employees and general public. We will never have more than five persons using this space. This space is not available to employees or general public.

An accessible route shall not be required to connect stories provided that the building or facility is not a shopping center, a shopping mall, the professional office of a health care provider, a terminal, depot or other station used for specified public transportation, an airport passenger terminal, or another type of facility as determined by the Attorney General.

We are requesting that the Chairlift be removed from the building plans.

Thank You,

Michael P. Heissenberg
President,
