Good morning Eric.

After speaking with the rest of the team, we believe the best way to estimate the cost for this rebuild is by square footage. We decided collectively that \$50.00 per square foot would probably cover all the costs according to your ideas and basic drawings. This would include all of the plumbing, electrical, flooring, ceilings, drywall, etc. Of course this amount could change according to updates or changes made, the closer we get to the actual build. Hope this is helpful. As always please feel free to contact us with any comments or questions.

Sincerely,

Brett

Brett Riegel
