Re: 1024 Michigan Avenue, Bldg A & C, Miami Beach Florida 33139

Per your requests, we estimate the total cost for the architectural, permitting, and construction and installation of an elevator in Building A & C to be approximately \$160,000.00. In my opinion, the installation of an elevator in both building would significantly change the building and is not practical. Please feel free to reach out to me with any questions.

Respectfully,
