CHIQUITA ANIMAL HOSPITAL

Issue: Vertical accessibility to the second floor of a veterinary clinic.

Analysis: The applicant is requesting a waiver from providing vertical accessibility to the second floor of an animal hospital. The project consists of a 2,800 square foot addition to the existing 3,675 square foot first floor. According to the applicant, it is both technically infeasible and disproportionate to the cost of the alteration to install an elevator in the facility. No cost estimates were submitted to substantiate the claim. The application states that the second floor will not be open to the public and that any employees could perform their job functions on the fully accessible first floor.

Project Status.

The project is under construction.

Items to be Waived:

Vertical accessibility to the second floor, as required by Section 553.509, F. S.

553.509 Vertical accessibility. Nothing in Sections 553.501-553.513 or the guidelines shall be construed to relieve the owner of any building, structure or facility governed by those sections from the duty to provide vertical accessibility to all levels above and below the occupiable grade level regardless of whether the guidelines require an elevator to be installed in such building, structure or facility except for:

(1) Elevator pits, elevator penthouses, mechanical rooms, piping or equipment catwalks and automobile lubrication and maintenance pits and platforms;
(2) Unoccupiable spaces, such as rooms, enclosed spaces and storage spaces that are not designed for human occupancy, for public accommodations or for work areas; and
(3) Occupiable spaces and rooms that are not open to the public and that house no more than five persons, including, but not limited to equipment control rooms and projection booths.

Waiver Criteria: There is no specific guidance for a waiver of this requirement in the code. The Commission's current rule, authorized in Section 553.512, Florida Statutes, provides criteria for granting waivers and allows consideration of unnecessary or extreme hardship to the applicant if the specific requirements were imposed.
opportunity to answer questions and/or give a short presentation **not to exceed 15 minutes**. The Commission will consider all information and the Council's recommendation before voting on the waiver.

This application is available in alternate formats upon request.

**REQUEST FOR WAIVER FROM ACCESSIBILITY REQUIREMENTS OF CHAPTER 553, PART V, FLORIDA STATUTES**

Your application will be reviewed by the Accessibility Advisory Council and its recommendations will be presented to the Florida Building Commission. You will have the opportunity to answer questions and/or make a short presentation, not to exceed 15 minutes, at each meeting. The Commission will consider all information presented and the Council's recommendation before voting on the waiver request.

1. **Name and address of project for which the waiver is requested.**

   **Name:** Chiquita Animal Hospital

   ________

   **Address:** 3714 Chiquita Boulevard

   Cape Coral, FL 33914

   ________

2. **Name of Applicant. If other than the owner, please indicate relationship of applicant to owner and written authorization by owner in space provided:**

   **Applicant's Name:** John Kacoyanis

   ________

   **Applicant's Address:** 3323 S.E. 22nd Place, Cape Coral, FL, 33904

   ________

   **Applicant's Telephone:** (239)-340-2161  **FAX:**

   ________

   **Applicant's E-mail Address:** Kacoyanis@MSN.com

   ________

   **Relationship to Owner:**

   ________

   **Owner's Name:** John Kacoyanis

   ________

   **Owner's Address:** 3323 S.E. 22nd Place, Cape Coral, FL, 33904

   ________
quotations or bids from at least two vendors or contractors.

a. A ramp is technically infeasable as a chair lift. It is also unnecessary as the individuals who would utilize the altered second floor are employees. Disabled employees can utilize equal accomodations on the ground floor where these functions are currently taking place.

b. 

c. 

10. **Licensed Design Professional:** Where a licensed design professional has designed the project, his or her comments MUST be included and certified by signature and affixing of his or her professional seal. The comments must include the reason(s) why the waiver is necessary.

   See item 10, attached.

Form No. 2001-01
3. Please check one of the following:

[ ] New construction.

[ ] Addition to a building or facility.

[X] Alteration to an existing building or facility.

[ ] Historical preservation (addition).

[ ] Historical preservation (alteration).

4. Type of facility. Please describe the building (square footage, number of floors). Define the use of the building (i.e., restaurant, office, retail, recreation, hotel/motel, etc.)

Two story building consisting of 6,475 S.F. total area, broken down as follows:

First floor area = 3,675 S.F., Second floor area = 2,800 S.F.

The use of this building is a "Veteranarian Hospital".

5. Project Construction Cost (Provide cost for new construction, the addition or the alteration):

#3
6. **Project Status:** Please check the phase of construction that best describes your project at the time of this application. Describe status.

[ ] Under Design  [X] Under Construction*

[ ] In Plan Review  [ ] Completed*

* Briefly explain why the request has now been referred to the Commission.

The local building office would not waive their interpretation of the code regarding vertical accessibility. The owner commissioned the Architect to provide design and construction drawings for the construction of an elevator. The bids for the elevator addition far exceeded the 20% financial feasibility limit by code. The local building office will issue a temporary certificate of occupancy once we submit this waiver request.

7. **Requirements requested to be waived.** Please reference the applicable section of Florida law. Only Florida-specific accessibility requirements may be waived.

**Issue**

1: FBC 2004 Chapter 11, Section 11 - 4.1.6 Accessible Buildings: Alterations.

This edition of the code does not apply to buildings, structures or facilities which were in existence on October 1, 1997, unless: we believe (i), (ii), (iii) do not apply.

**Issue**

2: Assuming that we do not meet the requirements in (1) above, and we need to comply with Section 11 - 4.1.6 Accessible Buildings: Alterations

Then we believe the following exemptions from providing an elevator apply.

**Issue**
3. Section 11 - 4.1.6 (1) technically infeasable. It is structurally infeasable to install the
  elevator on the interior of the building.

Section 11 - 4.1.6 (2) Alterations to an area containing a primary function. The addition
of an elevator is disproportionate to the overall alterations in terms of cost and scope.
Alterations shall be deemed disproportionate to the overall alteration when the cost
exceeds 20 percent of the cost of the alteration.

8. Reason(s) for Waiver Request: The Florida Building Commission may grant waivers
of Florida-specific accessibility requirements upon a determination of unnecessary,
unreasonable or extreme hardship. Please describe how this project meets the following
hardship criteria. Explain all that would apply for consideration of granting the waiver.

[ ] The hardship is caused by a condition or set of conditions affecting the owner which
does not affect owners in general.

We request that the Florida Building Commision grant us a wavier from the Florida -
specific accessibility requirement as interpreted by our local building official and as
briefly outlined in item 6 and 7 above. As indicated on our plans and per our request the
building is too small to justify the disproportionate cost.

[ ] Substantial financial costs will be incurred by the owner if the waiver is denied.

If the waiver is denied the alteration will be unusable and the owner will have to continue
conducting his practice in cramped quarters and will have to refuse additional service.

[ ] The owner has made a diligent investigation into the costs of compliance with the
code, but cannot find an efficient mode of compliance. Provide detailed cost estimates
and, where appropriate, photographs. Cost estimates must include bids and quotes.

See the attached cost estimate prepared by Stultz, Inc., General Contractor.

9. Provide documented cost estimates for each portion of the waiver request and
   identify any additional supporting data which may affect the cost estimates. For
   example, for vertical accessibility, the lowest documented cost of an elevator, ramp, lift
   or other method of providing vertical accessibility should be provided, documented by
10. My interpretation of the Code is that an elevator is not required. In accordance with Section 11 - 1.4.6.1 (K) (I) this code does not require the installation of an elevator in an altered facility that is less than three stories or less than 3,000 square feet per story. We meet both of these requirements. In addition, the code states that unless the Building is a Shopping Center, a Shopping Mall, the Professional Office of a Health Care Provider, or another type of facility as determined by the U.S. Attorney General. We do not fall in any of these categories. We are not the Professional Office of a Health Care Provider which implies Human Health Care and not a Veterinarian Animal Hospital.

In addition, Section 11 - 4.1.3 (5) Exception 1 for “Accessible Buildings - New Construction, states that “If Toilets or Bathing Facilities are provided on a level not served by an elevator, then a Toilet or Bathing Facility must be provided on the accessible ground floor.”

Therefore, if an elevator is not required for “Accessible Buildings - New Construction” one would conclude that an elevator would not be required for “Accessible Buildings - Alterations”.

Our attempts to provide vertical accessibility via an elevator proved to be both technically and financially infeasible in accordance with Section 11 - 4.1.6.1 (2) (1).

The owner has paid for Architectural and Engineering Services for the preparation of drawings for a new elevator addition to the existing building. He has solicited and received a bid from a Florida Licensed General Contractor. The cost is nearly as much as the cost of the interior remodeling which exceeds the 20% mentioned in Section 11 - 4.1.6. (2).

Adding an elevator to the existing building is not readily achievable. The definition of “readily achievable” in Section 11 - 3, “miscellaneous instructions and definitions” means easily accomplished and able to be carried out without much difficulty or expense.

In accordance with Section 11- 4, accessible elements and spaces: scope of technical requirements, 11 - 4.1 exceptions (a) if providing accessibility in conformance with this section to individuals with certain disabilities (e.g., those who use wheel chairs) would be structurally impracticable, accessibility shall nonetheless be ensured to persons with other types of disabilities (e.g., those who use crutches or who have sight, hearing, or mental impairments) in accordance with this section.

We are able to provide accessibility and equal accommodation to persons in wheelchairs on the ground floor where business is currently being conducted.

Section 11 - 2, General, 11 - 2.2 Equivalent facilitation. Departures from particular technical and scoping requirements of this code by the use of other designs and technologies are permitted where the alternative designs and technologies used will provide substantially equivalent or greater access to and usability of the facility.

Re: Chiquita Animal Hospital - Interior Remodeling
    3714 Chiquita Blvd., South
    Cape Coral, Fl. 33914
    Applic. No.: 06-00008883

Dear Kathy,

The following is a list of corrective measures which will be performed/executed in order to comply with your Plan Review Report.

BUILDING: KATHY CROTEAU, 573-3184

1. The exterior CMU Wall Infill meets and /or exceeds the 130 MPH Windload Pressure for fully enclosed structures + 34.6 P.S.F. The Contractor shall use "Heckmann No. 187, Masonry Wall Ties, 16 gage x 1\(\frac{1}{4}\)" wide x 5-\(\frac{1}{4}\)" long + 1-\(\frac{1}{2}\)" bend with a 5/16" hole, mill galvanized. The wall ties shall be anchored with \(\frac{1}{4}\)" tapcons w/minimum 1" embedment into existing C.M.U. wall or concrete the beam as shown on the "Blocked Opening Detail" attached.

2. We agree to provide vertical accessibility to the second floor as quickly as possible. We are currently designing the elevator portion of our proposed Phase II Building Addition. We anticipate this will take approximately three to four weeks. We understand that we may proceed with the initial construction (especially closing the exterior C.M.U. openings and repairing the soffits damaged during the hurricane) and we agree that we must have these plans submitted to the Building Department before they will conduct any inspections. We request that should any inspections be required for the exterior hurricane damage repair they be conducted upon request.

Our consideration/cooperation is deeply appreciated.
This document is a part of the original Contract Documents for the captioned project.

If you have any questions, please contact me.

Yours very truly,

Joe Dubek Architect, Inc.
