To Whom It May Concern,

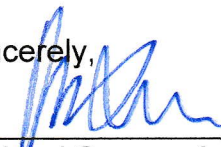

I have prepared the construction documents for the PJD's Amelia, LLC project. Mr. Voorhees seeks to expand a second floor exterior deck to allow for additional seating for his beer and wine garden.

No additional services will be provided on the second floor deck, it is strictly additional seating. All services that the business offers will be available to everyone on the first floor patio and nothing unique will be provided on the second floor deck.

Accessibility to the second floor deck would require one of two options: an exterior elevator or a platform lift. Both options are cost prohibitive to Mr. Voorhees.

I am supportive of the tenant, David Voorhees (PJD's Amelia, LLC) applying for, and receiving, a vertical accessibility wavier.

Please feel free to contact me with any questions.

Sincerely,  

---
