Re: Request for Waiver: Daniel Levesque  
3-D Archery Course & Range, Osteen

Dear Sir,

This office, at the request of the Property Owner, has designed and prepared construction documents for the above referenced space. The intended use for this space is an archery range for target practice. The range consists of five (5) raised positions above grade. Stations at grade level have also been provided to satisfy handicap accessibility required by the Florida Accessibility Code. The path at grade to these stations are provided with an asphalt type surface for handicapped access. In order to reach the upper levels it would require a ramp 150' long to meet the 1 to 12 pitch specified per code, an elevator or other vertical lift. The cost of which is prohibitive.

We respectfully request that a waiver be granted and a permit for construction be issued with the understanding that handicapped accessibility has been provided on the lower levels and is in reasonable compliance with the Florida Accessibility Code.

Thank you for your consideration in this matter.
