

Project Construction Cost Note

The primary hardship bases for this waiver request is technical infeasibility and historic preservation. A simultaneous application for a *threaten or destroy* consultation is being made to the State Historic Preservation Office. The results of that consultation will be provided to staff when it is issued.

Because of the various technical and historic preservation difficulties, it appears as though the cost to provide vertical accessibility may be disproportionate to the alteration to the Hemingway Office. If such disproportionality is confirmed, this application will be supplemented with supporting cost estimates and calculations.
