Issue: Vertical accessibility to the second floor.

Project Type: Alteration to an existing building or facility

Project Progress: In plan review

Compliance estimate + Amount spent on accessible features: \$42,450.00

Project Construction Cost + Construction Cost Over Past 3 Years \$88,494

Economic Hardship Threshold: $42,450/88,494= 48\%$

Analysis:

The applicant is requesting a waiver from providing vertical accessibility to the second floor of an existing 2-story apartment building. The existing 2-story apartment building is comprised of 4 units with 2 units upstairs and 2 units downstairs. These units are currently being used as rental properties and the owner wants to change the occupancy from R-3 (residential units) to R-1 (transient homes) so that the units could be used as short term rental units. The project construction cost is \$88,494.00 for the alteration. The applicant has submitted two cost estimates for compliance which have total amounts of \$27,000.00 and \$26,500.00 for installation of a lift with its associated installation costs. The accessibility compliance estimate plus the amount spent on accessible features is \$42,450.00. This includes the cost for the installation of a new handicap accessible ramp at the front of the building to allow for accessibility to the first floor units and the reconfiguration of an existing bathroom in unit 2. These costs comprise of 48% of the total project construction cost. The applicant alleges the hardship is caused by substantial economic hardship and technical infeasibility.
