Re: POC Update – Zion Tile

Mr. Madani,

Keystone Certifications is providing this update to the FBC Product Oversight Committee (POC) regarding the conformance of roof tiles represented by Florida Product Approval FL16057.1 as distributed by Zion Tile Corporation of Miami, Florida.

Keystone last performed a Quality Assurance Program inspection at the Zion Tile facility on 7/24/2013, there were product & process deficiencies discovered at that time. The Licensee responded to Keystone required actions in the timeframes allowed. Quality management system processes, capabilities and record keeping have now been established to ensure future product shipments conform to the product specification as represented by FL16057.

Zion Tile management is fully aware that FL16057 may only be employed to represent roof tile products conforming to the ASTM C1167 dimensional & weight tolerances relative to FL16057. Note: Zion Tile has initiated the FPA qualification of roof tile product at lesser dimensions relative to FL16057, and anticipates the completion of product evaluations by early November, 2013.

I plan to participate in the Thursday's POC Meeting conference call if there are any further questions.

Sincerely,

Jon Hill
President
