Carey,

The handicap accessibility waiver application to DPR request as part of the information submitted for the local building official to review the applicants request and make a recommendation on letterhead. Based on my discussions with the building department it is my understanding that the building official would have no objection to deleting the vertical accessibility requirement to the storage mezzanine for the North Trail RV Sales Center based on the documentation as submitted to the permitting department during its review for building permit. If this understanding is correct could you please provide us with a letter of review and recommendation which we could forward to the DPR. We are attaching the owner's original letter submitted to permitting, along with the owner's revised letter to DPR detailing additional information required for DPR review.

Thank you.

Greg
