

“Please provide cost estimate for providing an accessible toilet room”

The entire interior of the home has wood (Bead board) walls and ceilings in addition to the original DADE COUNTY PINE floor. We would have to remove several walls and construct new in order to accommodate the accessible toilet room. This is in addition to re-locating the toilet, completely removing the 1920 CLAW FOOT TUB, additional plumbing, electrical and most of all trying to match the existing ceiling, wall and floor materials needed for the repair/restoration work that will be required.

COST ESTIMATE FOR ABOVE IS APPROXIMATELY \$5,100

“Please provide proof of the residence being listed on the City of Stuart historic registry”

PLEASE SEE ATTACHED.
