

Issue: The Petitioner, Ms. Kathleen Ann Wilks, is requesting clarification with regard to the Section 553.504(6), Florida Statutes stating that “Barriers at common entrances or emergency exists of business establishments conducting business with the general public that are existing, under construction or under contract for construction which would prevent a person from using such entrance or exists must be removed.”

Staff Analysis: Because the petition in question is requesting an answer based on past conduct/decision that the City of Pensacola already addressed, answering this petition for declaratory statement would be legally Improper.
