Fidelity National Financial Hangar
Floor 2 Interior Improvements
Project No.: 2015-41

To the Florida Building Commission:

Fidelity National Financial (FNF) wishes to convert existing shell space on Floor 2 of its hangar for use by FNF pilots to do paperwork and relax during downtime at the airport. The area will not be open to the public.

FNF pilots are classified as Airline Transport Pilots and Federal Code of Regulations 61.23(a) requires that they hold a first class medical certificate. Because of this we believe it is reasonable to waive the FAC requirement for vertical accessibility to this Floor 2 space.

Cordially,

Jeffrey H. Rolland, AIA, LEED AP
