Issue:

The 2007 Florida Building Codes take effect December 31, 2008. Many companies will have fully executed contracts in hand for projects with previously approved building plans with anticipated construction to occur after implementation of the 2007 Florida Building Codes.

Many modular companies build multiple units to the same approved set of drawings. Customers may theoretically request and purchase units that have yet to be constructed on December 30, 2008.

Question:

What is the cut off date for constructing buildings to previously approved plans after implementation of the new codes on December 31, 2008?

Respectfully submitted,

Tom Hardiman
