RE: Notice of Approval

Mr. Madani,

Following recent conversations with Mr. Azhar Khan, No-Burn SE, Inc. requests a declaratory statement to indicate whether our No-Burn products fall under the scope of Rule 9B-72.

We submit that our products are not of structural nature, have no structural properties, but provide a fire and mold protection layer to the structural components including wood, steel and drywall. The products are interior and exterior Class A intumescent products that are non-toxic, non-carcinogenic and 100% green. Exterior applications require top coat protection of a paint or sealant for element protection. The products react to fire by creating a char barrier that protects the substrate from the fire and heat. The products only need to be re-applied in the areas activated by a fire, otherwise the protection will last the life of the structure. All applications are spray applied by Certified No-Burn SE technicians and inspected by No-Burn SE certified inspectors, per the ICC requirements.

General consideration is as follows:

1. No-Burn products are recognized under ICC ESR-1838.
2. No-Burn products have been tested in accordance with ICC, ASTM, NFPA and UL standards.
3. **Name of Products:** No-Burn Wood Gard Mh, No-Burn Plus Mh, No-Burn Original Mh
4. No-Burn SE maintains its quality assurance program in accordance with ICC requirements.
5. No-Burn, Inc. is the sole manufacturer of the No-Burn product line. No-Burn SE, Inc. is the Southeast representative and provides certified installations per ICC requirements.

Your assistance in the matter is appreciated.

Regards,

Chris Birchfield
VP of Business Development
