Re: Request for Declaratory Statement

Dear Mr. Madani

Currently there is a sports facility project under construction in Boynton Beach, Florida, located adjacent to the Aberdeen Club House at 8258 Aberdeen Drive. The project has a 645 square foot swimming pool equipment room with 24/7 forced air cross ventilation. The room is not used for chemical storage

It is requested that a declaratory statement be given on a requirement for power panels in such pool rooms to be NEMA rated Type 1, Type 3R, and Type 4X.

Your timely assistance in this manner would be very much appreciated.

Bob
