

2010 Alternative Florida Building Code Development Approach

**2007 FBC—
Base document**

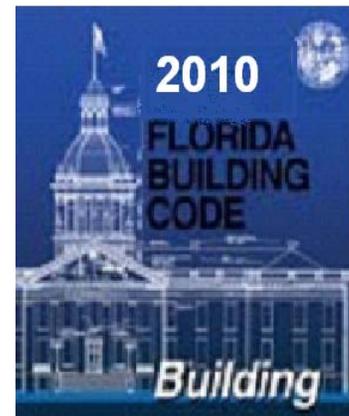

**Changes to the 2006 I-
Code for the 2009 I-Code**

+

=

2010 FBC

(1) Concerns and Comments from the public:

- Should use the Florida Code as the base document and incorporate I-Code changes into it.
- Need to show how the current Florida Building Code is changed both base code and new Florida Specific changes.

(2) Documents necessary for the Task:

- A document that lists changes to the 2006 I-Code for the 2009 I-Code

(3) Code Development:

- DCA staff post the 2007 FBC and all I-Code changes, which is the starting point for the 2010 Florida Building Code, and solicit proposals and amendments on them from the public.
- Commission reviews proposals and amendments from the public and approves the changes to the base code.
- Staff develops a supplement (approved proposals/amendments) for rule adoption.
- ICC incorporate the supplement into the Base Code, 2007 Florida Building Code for the publication of the 2010 FBC.
- Marking in the margin shows changes to the base document 2007 Florida Building Code.
