Summary o	f Modification						
Adds	(s) to door, correcting	the sentence. N	lo substantive cha	ange.			
Rationale	des the plural door(s) t	o correct how th	ne sentence shou	ld read			
	ct Statement	o correct now ti	ie sentence snou	iu reau.			
Impac	ct to local entity relation	ve to enforcem	ent of code				
Impac	ct to building and prop None	perty owners re	lative to cost of	compliance with cod	le		
Impac	ct to industry relative None	to the cost of c	ompliance with c	ode			
Requirement	s						
Has a	reasonable and subs	tantial connect	ion with the heal	th, safety, and welfa	re of the general pub	lic	
Stren	gthens or improves the Fixes a typo	e code, and pr	ovides equivalen	t or better products	, methods, or systems	s of construction	
Does	not discriminate agai	nst materials, p	roducts, method	s, or systems of co	nstruction of demons	trated capabilities	
Does	No not degrade the effect	tiveness of the	code				
2000	No						
s the propose	d code modification p	eart of a prior co	ode version? No				
	(a.) Conflicts within	the updated c	ode;				
	(b.) Conflicts betwe	en the update	d code and the	Florida Fire Prever	ntion Code adopted	pursuant to chapte	er
X	(c.) Unintended res model code;	ults from the ir	ntegration of pre	eviously adopted Fl	orida-specific amen	dments with the	
	(d.) Equivalency of	standards;					
	(e.) Changes to or i	nconsistencie	s with federal or	state law;			
	(f.) Adoption of an u	pdated edition	n of the National	l Electrical Code if	the commission find	s that delay of	

implementing the updated edition causes undue hardship to stakeholders or otherwise threatens the public

health, safety, and welfare.

Page:

**454.1.3.1.9** All public pools shall be surrounded by a minimum 48 inch (1219 mm) high fence or other approved substantial barrier. The fence shall be continuous around the perimeter of the pool area that is not otherwise blocked or obstructed by adjacent buildings or structures and shall adjoin with itself or abut to the adjacent members. Access through the barrier or fence from dwelling units, such as homes, apartments, motel rooms and hotel rooms, shall be through self-closing, self-latching lockable gates of 48 inch (1219 mm) minimal height from the floor or ground with the latch located a minimum of 54 inches (1372 mm) from the bottom of the gate or at least 3 inches (76 mm) below the top of the gate on the pool side. If the self-closing, self-latching gate is also self-locking and is operated by a key lock, electronic opener or integral combination lock, then the operable parts of such locks or openers shall be 34 inches minimum (864 mm) and 48 inches maximum (1219 mm) above the finished floor or ground. Doored access points from public rooms such as lobbies or club houses need not be through gates if the door(s) meet the same self closing, self latching requirements as a gate. Gates shall open outward away from the pool area. A latched, lockable gate shall be placed in the fence within ten feet (3048 mm) of the closest point between the pool and the equipment area for service access.

Standard update proposals

#### **Summary of Modification**

Corrects standard references to match the appropriate name, as standards have been updated NSPI has been replaced with APSP.

#### Rationale

Accurately reflects the titles of the standards to reflect the ones that have been updated from NSPI to APSP/ICC standards.

#### **Fiscal Impact Statement**

Impact to local entity relative to enforcement of code

Ensures what is in the code matches the title of the standard.

Impact to building and property owners relative to cost of compliance with code

Impact to industry relative to the cost of compliance with code

None

#### Requirements

Has a reasonable and substantial connection with the health, safety, and welfare of the general public

Strengthens or improves the code, and provides equivalent or better products, methods, or systems of construction

Yes

Does not discriminate against materials, products, methods, or systems of construction of demonstrated capabilities

Does not degrade the effectiveness of the code Is the proposed code modification part of a prior code version? No

No

	(a.) Conflicts within the updated code;
	(b.) Conflicts between the updated code and the Florida Fire Prevention Code adopted pursuant to chapter 633;
	(c.) Unintended results from the integration of previously adopted Florida-specific amendments with the model code;
Χ	(d.) Equivalency of standards;
	(e.) Changes to or inconsistencies with federal or state law;
	(f.) Adoption of an updated edition of the National Electrical Code if the commission finds that delay of implementing the updated edition causes undue hardship to stakeholders or otherwise threatens the public health, safety, and welfare.

#### **Summary of Modification**

Corrects standard references to match date/edition/name information as published.

#### Rationale

Accurately reflects the titles of the standards to reflect the ones that have been updated to ANSI/APSP/ICC standards, updates the editions for APSP 6 and fixes a Building Code section reference under APSP-7.

#### **Fiscal Impact Statement**

#### Impact to local entity relative to enforcement of code

Ensures what is in the code matches the title/edition/date of standard.

Impact to building and property owners relative to cost of compliance with code

Impact to industry relative to the cost of compliance with code

None

#### Requirements

Has a reasonable and substantial connection with the health, safety, and welfare of the general public

Strengthens or improves the code, and provides equivalent or better products, methods, or systems of construction

Does not discriminate against materials, products, methods, or systems of construction of demonstrated capabilities

Does not degrade the effectiveness of the code

No

	(a.) Conflicts within the updated code;
	(b.) Conflicts between the updated code and the Florida Fire Prevention Code adopted pursuant to chapter 633;
	(c.) Unintended results from the integration of previously adopted Florida-specific amendments with the model code;
Χ	(d.) Equivalency of standards;
	(e.) Changes to or inconsistencies with federal or state law;
	(f.) Adoption of an updated edition of the National Electrical Code if the commission finds that delay of implementing the updated edition causes undue hardship to stakeholders or otherwise threatens the public health, safety, and welfare

#### **Related Modifications**

Mod dealing with section R403.9.1.2

#### **Summary of Modification**

Provides clarity that geothermal pool heat pumps are not required to meet AHRI 1160. The performance of these units has no relationship to air temperature and currently there is no AHRI standard that applies to geothermal swimming pool heat pumps.

#### Rationale

Provides clarity that geothermal pool heat pumps are not required to meet a minimum 4.0 C.O.P. at the AHRI 1160 Low Temperature test point of 50°F. The performance of these units has no relationship to air temperature; therefore, the AHRI requirement is inappropriate for the geothermal type of heat pump. There is no AHRI standard that applies to geothermal swimming pool heat pumps at this time. It is a generally accepted fact that geothermal heat pumps are more efficient than air source heat pumps and therefore this proposal is not lessening efficiency.

#### **Fiscal Impact Statement**

Impact to local entity relative to enforcement of code

None

#### Impact to building and property owners relative to cost of compliance with code

Could lessen any costs associated with a property owner choosing this type of product, but then having to document why this product will not have documentation showing it meets the AHRI 1160 standard.

#### Impact to industry relative to the cost of compliance with code

Could lessen any costs associated with having to document why this product will not have documentation showing it meets the AHRI 1160 standard.

#### Requirements

Has a reasonable and substantial connection with the health, safety, and welfare of the general public N/A

#### Strengthens or improves the code, and provides equivalent or better products, methods, or systems of construction

Strengthens code by clarifying a very efficient product is not required to meet a standard that was never intended for such product.

Does not discriminate against materials, products, methods, or systems of construction of demonstrated capabilities

No

Does not degrade the effectiveness of the code

No

Χ	(a.) Conflicts within the updated code;
	(b.) Conflicts between the updated code and the Florida Fire Prevention Code adopted pursuant to chapter 633;
	(c.) Unintended results from the integration of previously adopted Florida-specific amendments with the model code;
	(d.) Equivalency of standards;
	(e.) Changes to or inconsistencies with federal or state law;
	(f.) Adoption of an updated edition of the National Electrical Code if the commission finds that delay of implementing the updated edition causes undue hardship to stakeholders or otherwise threatens the public health, safety, and welfare.

### Summary of Modification

Corrects standard reference to match date/edition/name information as published.

#### Rationale

Accurately reflects the titles of both standards to reflect they are ANSI/APSP/ICC standards and updates the APSP-15 standard to show it was published in 2013 as APSP-15a....for the Addenda A approved on January 9, 2013 by ANSI. Didn't appear that the "including Addenda A...." was necessary since the published version notes the Addenda A with the small a next to the 15. If needed, would still need to be updated to accurately reflect the January 9 date.

#### **Fiscal Impact Statement**

#### Impact to local entity relative to enforcement of code

Ensures what is in the code matches the title/edition/date of standard.

Impact to building and property owners relative to cost of compliance with code

None

Impact to industry relative to the cost of compliance with code

None

#### **Related Modifications**

SW 6265, 6266, and 6267

#### **Summary of Modification**

Corrects standard references to match date/edition/name information as published.

#### Rationale

Accurately reflects the titles of the standards to reflect the ones that have been updated to ANSI/APSP/ICC standards, updates editions for APSP-4 and APSP-5 to reflect changes already made in the building code book standard reference chapter, but that were missed here under the triennal cycle (so this provides consistency between Res and Bld) and updates the editions for APSP 6.

#### **Fiscal Impact Statement**

#### Impact to local entity relative to enforcement of code

Ensures what is in the code matches the title/edition/date of standard.

Impact to building and property owners relative to cost of compliance with code
