| Manufacturing: | Oceanside, CA |  |
| Quality Assurance: | UL LLC (QUA9625) |  |

## Scope

| Category: | Roofing |
| :--- | :--- |
| Subcategory: | Metal Roofing |
| Code Sections: | 1504.3.1, 1504.3.2, 1518.9, 1523.6.5.2.4 |
| Properties: | Wind Resistance, Physical Properties |

## Product Description

## Pine Crest Shake

Profile: $\quad 16 \mathrm{in} . \times 52 \mathrm{in}$. panel; leading edge is turned down 1 in . and back edge is bent up and horizontally back 1.5 in . Panel side laps are 2 in.
Description: Preformed, fastened, stoned-coated steel panels with No. 14 granule Material:

## Cottage Shingle

Profile: $\quad 14 \mathrm{in} . \times 51 \mathrm{in}$. panel; leading edge is turned down 1 in . and back edge is bent up and horizontally back 1.5 in . Panel side laps are 2 in.
Description: Preformed, fastened, stoned-coated steel panels with No. 14 granule
Material: $\quad$ Min. 26 ga. ASTM A792 AZ50; $F_{y}=\min .40 \mathrm{ksi}$; Shall conform with FBC Section 1507.4.3

This evaluation report is provided for State of Florida product approval under Rule 61G20-3. The manufacturer shall notify CREEK Technical Services, LLC of any product changes or quality assurance changes throughout the duration for which this report is valid. This evaluation report does not express nor imply warranty, installation, recommended use, or other product attributes that are not specifically addressed herein.

## Pacific Tile

Profile: $\quad 16 \mathrm{in} . \times 52 \mathrm{in}$. panel; leading edge is turned down 1 in . and back edge is bent up and horizontally

## Description:

 Material: back 1.5 in. Panel side laps are 2 in.Preformed, fastened, stoned-coated steel panels with No. 14 granule
Min. 26 ga. ASTM A792 AZ50; $\mathrm{F}_{\mathrm{y}}=\mathrm{min} .40 \mathrm{ksi}$; Shall conform with FBC Section 1507.4.3

## Barrel Vault Tile

Profile:
Description: Material:

13-1/2 in. to 14 in. x 45-1/8 in. panel
Preformed, fastened, stoned-coated steel panels with No. 14 granule
Min. 26 ga. ASTM A792 AZ50; $F_{y}=$ min. 40 ksi; Shall conform with FBC Section 1507.4.3

## Granite Ridge Shingle

Profile: Description: Material:

Metal shingle with Pittsburgh lock at head lap; 13-11/16 in. x 44 in. coverage
Preformed, fastened, stoned-coated steel panels with No. 14 granule
Min. 26 ga. ASTM A792 AZ50; $F_{y}=$ min. 40 ksi; Shall conform with FBC Section 1507.4.3

This evaluation report is provided for State of Florida product approval under Rule 61G20-3. The manufacturer shall notify CREEK Technical Services, LLC of any product changes or quality assurance changes throughout the duration for which this report is valid. This evaluation report does not express nor imply warranty, installation, recommended use, or other product attributes that are not specifically addressed herein.

## Installation

Note - Refer to the APPROVED AsSEMBLIES section of this report for the maximum design pressures of the approved assemblies.

Unless otherwise specified in this report the following installation details shall be met for the named products:

## Direct-to-Deck Installation Patterns

## Pine Crest Shake - Direct-to-Deck Pattern 1

Cottage Shingle - Direct-to-Deck Pattern 1

Pacific Tile - Direct-to-Deck Pattern 1

Pine Crest Shake - Direct-to-Deck Pattern 2

Cottage Shingle - Direct-to-Deck Pattern 2

Pacific Tile - Direct-to-Deck Pattern 2

This evaluation report is provided for State of Florida product approval under Rule 61G20-3. The manufacturer shall notify CREEK Technical Services, LLC of any product changes or quality assurance changes throughout the duration for which this report is valid. This evaluation report does not express nor imply warranty, installation, recommended use, or other product attributes that are not specifically addressed herein.

## Direct-to-Deck Installation Patterns

Barrel Vault - Direct-to-Deck Pattern 1

## Barrel Vault - Direct-to-Deck Pattern 2

## Over Batten Installation Patterns

Pine Crest Shake - Batten Pattern 1

Pacific Tile - Batten Pattern 1

Barrel Vault - Batten Pattern 1

Pine Crest Shake - Batten Pattern 2

Pacific Tile - Batten Pattern 2

Barrel Vault - Batten Pattern 2

| D | 60 ft | 60 ft | 60 ft | 60 ft | 33 ft | 19 ft | NA | NA | NA |

Notes: 1) Exposure category for the structure location shall be as defined in the Florida Building Code 2) Limitations are based on the exposed area of $10 \mathrm{ft}^{2}$ or less 3) Topographic factors such as escarpments or hills are not included in the above assessment 4) Applicable for Enclosed Buildings without overhangs 5) NA = "Not Allowed" 6) $K_{d}=0.85$ 7) Projects with mean roof heights of greater than 60 ft shall be evaluated by a licensed design professional 8) See page 13 for details for dimensions and locales of Zone 1, 2, and 3 9) $\mathrm{V}_{\text {ult }}$ is shown in the above table. Design pressures are calculated using $\mathrm{V}_{\text {asd }}=\mathrm{V}_{\text {uti }} \sqrt{ } 0.6$ per 1609.3.1.
${ }^{A}$ For hip roofs 2:12 to 5.6:12, Zone 3 shall be treated as Zone 2

This evaluation report is provided for State of Florida product approval under Rule 61G20-3. The manufacturer shall notify CREEK Technical Services, LLC of any product changes or quality assurance changes throughout the duration for which this report is valid. This evaluation report does not express nor imply warranty, installation, recommended use, or other product attributes that are not specifically addressed herein.

Technical Services, LLC

## Batten/Counter Batten Installation (non-hVHZ only)

The following tables provide requirements for batten/counter batten installations based on design wind load requirements as defined in Chapter 16 of the FBC. Counter battens shall be minimum No. 2 SPF 1x4 dimensional lumber having the minimum specific gravity specified in the tables below. Battens shall be minimum No. 2 SPF $2 \times 2$ dimensional lumber having the minimum specific gravity specified in the tables below.

| Batten and Counter Batten Spacing and Fastener Requirement for Reroofing with Counterbatten and Rafter of Specific Gravity $\geq 0.36$ |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

Notes: 1) For hip roofs between 3:12 and 5.6:12 Zone 3 shall be treated as Zone 2
2) The batten and counter batten fasteners shall minimum $16 \mathrm{~d} \times 3.5$-inch ring shank nails and \#8 $\times 3$-inch wood screws
3) For batten to counter batten attachment, the number of fasteners at each intersection are shown for each wind load condition
4) For counter batten to rafter/truss attachment, the fastener spacings along each counterbatten are shown for each wind load condition. The counter batten fastener shall penetrate into the rafter/truss a minimum distance (p) as shown on the table
5) NA = not applicable

This evaluation report is provided for State of Florida product approval under Rule 61G20-3. The manufacturer shall notify CREEK Technical Services, LLC of any product changes or quality assurance changes throughout the duration for which this report is valid. Notes: 1) For hip roofs between 3:12 and 5.6:12 Zone 3 shall be treated as Zone 2
2) The batten and counter batten fasteners shall minimum $16 \mathrm{~d} \times 3.5$-inch ring shank nails and $\# 8 \times 3$-inch wood screws
3) For batten to counter batten attachment, the number of fasteners at each intersection are shown for each wind load condition
4) For counter batten to rafter attachment, the fastener spacings along each counter batten are shown for each wind load condition. The counter batten fastener shall penetrate into the rafter a minimum distance $(p)$ as shown on the table

This evaluation report is provided for State of Florida product approval under Rule 61G20-3. The manufacturer shall notify CREEK Technical Services, LLC of any product changes or quality assurance changes throughout the duration for which this report is valid. This evaluation report does not express nor imply warranty, installation, recommended use, or other product attributes that are not specifically addressed herein.

## Gable

Hip

Dimension "a" shall be 10\% of the least horizontal dimension or ( $0.4 \times$ Mean Roof Height), whichever is smaller, but not less than either $4 \%$ of the least horizontal dimension or 3 ft .

## LIMITATIONS

1. Fire classification is not within the scope of this evaluation.
2. The roof deck and the roof deck attachment shall be designed by others to meet the minimum design loads established for components and cladding and in accordance with FBC requirements.
3. Reroofing shall be in accordance with FBC Section 1511 outside the HVHZ or Section 1521 within the HVHZ.
4. Installation of the evaluated products shall comply with this report, the FBC and RAS 133 in the HVHZ, and the manufacturer's published application instructions. Where discrepancies exist between these sources, the more restrictive and FBC compliant installation detail shall prevail.
5. All products listed in this report shall be manufactured under a quality assurance program in compliance with Rule 61G20-3.
