Re: Acquisition of Omega Point Laboratories, Inc.

Dear Mr. Wolfe,

This letter is to advise your company and any other interested parties of the current status of Omega Point Laboratory's Test reports.

As you may be aware, in the spring of 2005, Intertek Testing Services acquired Omega Point Laboratories (OPL). Along with that, Intertek acquired all of OPL's equipment and files including test reports, Listing & Labeling documentation, and client lists. Certainly there have been some changes since then, but all of the legacy OPL reports continue to be maintained by Intertek.

Should you have any questions about this or another matter, do not hesitate to contact us. Please be aware that without written authorization from our clients, our confidentiality policy prevents us from discussing or even acknowledging specific tests, though we can certainly discuss testing issues in general terms. I am sure that you understand.

Sincerely,

C. Anthony Peñaloza
Flammability Testing Team Leader, Building Products

INTERTEK ACQUIRES OMEGA POINT LABORATORIES, INC.

Purchase strengthens Intertek's leadership position in the testing, inspection and certification of Building Products in North America.

ARLINGTON HEIGHTS, Ill., April 29, 2005 — The ETL SEMKO division of Intertek Group plc (LSE: ITRK), a global leader in testing, inspection and certification, today announces its acquisition of 100 percent of the issued share capital of Omega Point Laboratories, Inc. (OPL), an established industry leader in testing building materials and systems. OPL, based in Elmendorf, Texas near San Antonio, will be part of the ETL SEMKO division.

"OPL's capabilities in fire resistance, flammability and flame spread testing are an ideal complement to our existing services," said Jeff Turcotte, vice president Building Products, Intertek. "Intertek can now provide expanded fire testing solutions to our Building Products clients. With more efficient and comprehensive solutions, our clients can get their products to market faster than ever before."

The acquisition provides Intertek the ability to offer gas and electrical safety testing and certification services to a new subset of the Building Products industry, and ultimately will increase market share for its Warnock Hersey Listed and ETL Listed marks.

Since Omega Point's inception in 1985, its goal has always been to deliver first-class customer service. "On one hand, we're excited to bring decades of fire testing expertise to Intertek's global clients," said Deg Priest, president and CEO, OPL. "On the other hand, we're thrilled to now offer Intertek's global capabilities to our existing clients. It's a perfect combination of resources."

ETL SEMKO is a division of Intertek plc (LSE: ITRK), a global leader in testing, inspection and certification services, operating in 273 laboratories and 521 offices in 100 countries throughout the world. The ETL SEMKO division of Intertek provides access to global markets through its local services, which include product safety testing and certification, EMC testing and performance testing for customers in such industries as wireless technology, security, appliances, HVAC, cables and wiring accessories, industrial machinery, medical devices, telecommunications, lighting, automotive, semiconductor, building products and electronics.
