- ***Highlights of Important changes in the 2010 Florida Building Code, Fuel Gas***
- ***2010 Florida Building Code, Fire and Life Safety***

Course Objectives / Cognitive Domain knowledge level goals:

With Time Allotments:

- The contractor will better understand the history and scope of the 2010 Florida Building Code. (Time 5 minutes pages 1-2)
- The contractor will better understand the 2010 **Building,** Florida Building Code. (Time 15 minutes – pages 2 - 14)
- The Contractor will understand the 2010 **Residential,** Florida Building Code. (Time 10 minutes – pages 14-20)
- The Contractor will be able to identify 2010 Florida Building Code changes. (Time 20 minutes - pages 20 - 39)

Instructional Method:

This is an on line course which requires reading then taking a multiply choice examination. Access to ten multiple choice questions are provided once the student has been on line for a minimum of 50 minutes. Once the student answers 70 percent of the question correctly they will receive notice of their passing score. The program will then upload the student passing information to the state system and send an email notice to the student of the state notification. The student will then be able to print a certificate indicating successful completion of the course. Student test records will be stored automatically. Students are required to have identification prior to taking a course. While taking the course a student will be asked previously answered question to assure they are still on line. If at any time during the 50 minute course the system notes 15 minutes of inactivity the course will shut down and the student will have to start the 50 minute timer again.

Evaluation Method:

Multiple Choice exam covering, proportionately, the course topics. Students must achieve a passing score of 70%.
