Issue: Vertical accessibility to the second floor.

Project Type: Alteration to an existing building

Project Progress: In plan review

Compliance estimate: \$122,400.00

Project Construction Cost + Construction Cost Over Past 3 Years: \$196,400.00

Economic Hardship Threshold:

$$\frac{122,400}{196,400} = 62\%$$

Analysis:

The applicant is requesting a waiver from providing vertical accessibility to all levels of a hotel. They are remodeling a 2 story apartment building as a 3 room Hotel with approximately 2373 sqft. The alteration budget is \$114,300.00 and consist of fire alarm system, doors, railings, windows, painting and a balcony. In the past 3 years \$82,100.00 was spent on new AC, paint, cabinets, counter tops, refinishing floors, electrical, appliances, furniture and landscaping. The Applicant asserts structure of the building will not support the structural requirements for the installation of vertical accessibility to the second level without upgrading the entire structure structurally. At the ground level, raising the walkway to eliminate the step at guest room entrances would adversely impact the structural integrity of the building as well as encroach into the zoning setbacks. Applicant submitted an estimate of \$122,400.00 for an elevator. The hardship is caused by a condition or set of conditions affecting the owner which does not affect owners in general.
