Hi Don- we will provide the entry door from the East and the exit door to the West (into the building). We will also provide the surrounding structure to the VPL that matches the building's siding material. In other words you will simply install and mechanically and electrically hook up the VPL to an existing slab as if it were a stand-alone and we will build the enclosure, including the roof, as well as the entry doors around your VPL. So basically, we just need to know the price of the VPL. The drawing you sent looks like the one we need.

Thanks, Vicki

Hi Don- Here is the application for which we need the VPL.

If we could get a written cost estimate for the VPL, we would appreciate it. We will do the foundation, and enclosure. Also, any tech drawings.

Thank you, Vicki Brittain (813) 782-9345
