Mr. Madani,

I appreciate you incorporating some of my comments into the latest draft under resource materials.

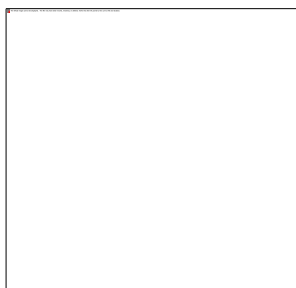

While I understand that the intricacies of building envelope inspections may be beyond the scope of this guide, I would welcome the opportunity to volunteer on a working group level for inspection of windows and doors.

Alternatively, perhaps you, or the committee, can review the attached presentation that I prepared for the American society of civil engineers and find items suitable to include in the guide?

I have also included a copy of my credentials for your review.

Also, be advised that the word Tempered is misspelled on the 4th bullet point under item H, page 32 of 38.

Regards,

Rick De La Guardia, B.S.A.E., E.I., M. ASCE
