

**Mike Holt's Advanced Code Module Course for Electricians**  
1 Hour CEU Requirement  
Online Program

**Course Syllabus**

This is an online course. We designed this course to be used along with the 2004 Florida Building Codes. Because this course is essentially an exam of 35 questions, it forces the student to study and locate the answers to the questions within the text of the Florida Building Codes. Through their search, the student learns many aspects of the Florida Building Codes. We've developed online courses similar to this for the state of Washington and Texas. We've received positive feedback on these existing courses. If you're interested in taking a look at any of our online courses, some of which are already approved by the Florida Board, you may do so at [www.mikeholt.com](http://www.mikeholt.com).

Essentially there is no course syllabus, because this is an online test taken in one sitting to fulfill a one hour requirement for continuing education.
