* Briefly explain why the request has now been referred to the Commission.

Need a waiver for vertical accessibility to all levels of bleacher seating at gymnasium and grand stands at Football, Baseball and Softball fields.

7. Requirements requested to be waived. Please reference the applicable section of Florida law. Only Florida-specific accessibility requirements may be waived.

Issue

1: Florida Statue 53.509 Vertical Accessibility

8. Reason(s) for Waiver Request: The Florida Building Commission may grant waivers of Florida-specific accessibility requirements upon a determination of unnecessary, unreasonable or extreme hardship. Please describe how this project meets the following hardship criteria. Explain all that would apply for consideration of granting the waiver.

[x] The hardship is caused by a condition or set of conditions affecting the owner which does not affect owners in general.

The waiver is necessary in order to provide facilities for public use within the bounds of the budget. Providing accessibility to all levels of the collapsible seating in the gymnasium and at the grand stands is not feasible and would incur unnecessary cost and cause an extreme hardship in complying. We believe that the proposed design includes adequate accessible seating arrangements. This condition affects all owners of this type of facility.

[x] Substantial financial costs will be incurred by the owner if the waiver is denied.

Not Applicable

[x] The owner has made a **diligent investigation** into the costs of compliance with the code, but cannot find an efficient mode of compliance. Provide detailed cost estimates and, where appropriate, photographs. Cost estimates must include bids and quotes.

We have dispersed and integrated the accessible seating areas in the bleachers at the floor of the gym. At the grand stands we have also integrated the accessible seating areas in the first row of seating. Vertical accessibility to all levels (every row of seating) through design and/or cost is impractical.

9. Provide documented cost estimates for each portion of the waiver request and identify any additional supporting data which may affect the cost estimates. For example, for vertical accessibility, the lowest documented cost of an elevator, ramp, lift or other method of providing vertical accessibility should be provided, documented by quotations or bids from at least two vendors or contractors.

a. All accessibility features described above and in the attached drawings are already included in the projects guaranteed maximum price and are not separate line items.

10. Licensed Design Professional: Where a licensed design professional has designed the project, his or her comments **MUST** be included and certified by signature and affixing of his or her professional seal. The comments must include the reason(s) why the waiver is necessary.

Fivay High School has been designed to provide the maximum accommodations to accessibility within the difficult constraints of the project budget. All of the educational spaces are fully accessible in compliance with state statues. The areas for assembly seating presents an extreme hardship to achieve compliance.

In the gymnasium, the bleachers are of a telescoping variety to maximize the primary use of the space for physical education as well as their supplemental use for games and assemblies. Providing full accessibility would require a fixed seating system type and much larger space requirements to accommodate the assemblies or games. To provide accessible seating within all levels of the Grand Stands at the Football, Baseball and Softball fields would require significant and costly structures that were not feasible in the State mandated Budget for this project.

CERTIFICATION OF APPLICANT:

I hereby swear or affirm that the applicable documents in support of this Request for Waiver are attached for review by the Florida Building Commission and that all statements made in this application are to the best of my knowledge true and correct.
