**Re:** Request to Remove Items from the Consent Agenda at October Meeting

---

Please accept the following list of the proposed changes from Chart 1 to be pulled from the consent agenda at the request of FHBA. While FHBA does not necessarily oppose all the changes, the manner of the recommendation for adoption in our opinion was contrary to the spirit of the legislation requiring the code review. A considerable number of the changes are editorial, clarification, and relocation changes. The majority of the changes cite Criteria f as the basis for the recommendation of approval. We believe Criteria f was intended to be limited to the update of referenced standards or the adoption of new referenced standards. These types of changes are appropriate for the Phase II Triennial Update and should not have been recommended for approval during the Phase I Code Review.

Should you have any questions or need further information, please do not hesitate to contact me at your earliest convenience.
