Hello Mo.

The current wording from 553.791 (13) and section (15) from HB 809 has the private provider required to sign and seal or electronically transmit to the local building official. We would request that the notary section not be required/removed since we are also required to sign and seal.

(13) Upon completion of all required inspections, the private provider shall prepare a certificate of compliance, on a form acceptable to the local building official, summarizing the inspections performed and including a written representation, under oath, that the stated inspections have been performed and that, to the best of the private provider's knowledge and belief, the building construction inspected complies with the approved plans and applicable codes. The statement required of the private provider shall be substantially in the following form and shall be signed and sealed by a private provider as established in subsection (1) or may be electronically transmitted to the local building official:

Thank you
