

Subject: Clarification on ISO/IEC 17025 Accreditation and PRI's Independence

To whom it may concern,

I would like to address the concern regarding the independence of **PRI (Performance Review Institute)** and its role as a testing laboratory for our materials.

ISO/IEC 17025 is the internationally recognized standard that establishes the requirements for the **competence, impartiality, and reliability of testing and calibration laboratories**. Laboratories accredited to this standard undergo rigorous assessments to ensure:

- **Technical competence** in conducting valid and reproducible tests.
- **Compliance with international quality management systems** that uphold integrity and transparency.
- **Traceability and accuracy** in test results, aligning with globally accepted benchmarks.
- **Independence from external pressures**, ensuring that test data remains objective and free from conflicts of interest.

As an **ISO 17025-accredited** third-party laboratory, **PRI operates under strict compliance with these principles**. The accreditation itself guarantees that **PRI is an independent testing entity**, eliminating the need for additional documentation such as a Certificate of Independence (C.O.I.).

Furthermore, **PRI has been a trusted testing facility in Florida since 1988**, serving over **2,200 manufacturers in the building industry**, including **Decra, Tilcor, and Roser**. Their long-standing credibility, along with their ISO 17025 accreditation, ensures that their testing results are fully compliant with industry regulations and globally recognized.

To streamline the approval process, we kindly request that **PRI's ISO/IEC 17025 accreditation be accepted as verification of their independence**. Attached, you will find supporting documentation from PRI, including their **ISO certification and relevant compliance statements**.

Please let us know if any additional information is required. We appreciate your cooperation in ensuring that industry-recognized standards are upheld in this process.

Best regards,

Milo Olson III
