Evaluation Report

"S-Deck or Curved S-Deck"

Metal Roof Assembly

Manufacturer:

Berridge Manufacturing Company

1720 Maury Road Houston, TX 77026 (800) 231-8127

for

Florida Product Approval

FL 14210.8 R5

Florida Building Code 7th Edition (2020)

Method: 1 - D

Category: Structural Components

Sub - Category: Roof Deck

Product: "S-Deck or Curved S-Deck" Roof Panel

Material: Steel
Panel Width: 31.5"

Support: Steel Purlins

Prepared by:

James L. Buckner, P.E., S.E.C.B.

Florida Professional Engineer # 31242

Florida Evaluation ANE ID: 1916 Project Manager: Diana Galloway Report No. 20-227-SDeck-S4P-ER

Manufacturer: Berridge Manufacturing Company

1720 Maury Road Houston, TX 77026 (800) 231-8127 www.berridge.com

Product Name: "S-Deck or Curved S-Deck"

Product Category: Structural Components

Product Sub-Category Roof Deck

Compliance Method: State Product Approval Rule 61G20-3.005 (1) (d)

Product/System

"S-Deck or Curved S-Deck" Roof Panel

Description: Steel lapped roof panel fastened into Steel Purlins.

Product Assembly as Evaluated:

Refer to Page 4 of this report for product assembly components/materials &

standards:

- Roof Panel
 Panel Clip
- 3. Fasteners
- 4. Insulation (Optional)

Support: Type:

Steel Purlins

(Design of steel support and its attachment to support framing is outside the

scope of this evaluation.)

Description:

• 16 Gauge minimum

• Yield Strength: 50 ksi minimum

Slope: Minimum slope shall be in compliance with FBC Chapter 15 based on the type of

roof covering, applicable code sections and in accordance with manufacturer's

recommendations.

Arch Minimum Radius for Curved Panel:

5' - 0"

Performance: Wind Uplift Resistance:

• Design Uplift Pressure: METHOD 1: - 78.3 PSF

(Refer to "Table A" attachment details herein) METHOD 2: - 190 PSF

Report No.: 20-227-SDeck-S4P-ER

Page 3 of 8

Specialty Structural Engineering

CBUCK, Inc. Certificate of Authorization #8064

Performance Standards: The product described herein has demonstrated compliance with:

ASTM E 1592-05 – Test Method for Structural Performance of Sheet Metal Roof

and siding Systems By Uniform Static Air Pressure Difference

Standards Equivalency: The ASTM E 1592-01 standard version used to test the evaluated product

assembly is equivalent with the prescribed standards in ASTM E 1592-05 adopted

by the Florida Building Code 7th Edition (2020).

Code Compliance: The product described herein has demonstrated compliance with Florida Building

Code 7th Edition (2020), Section 1504.3.2.

Evaluation Report

Scope:

This product evaluation is limited to compliance with the structural requirements of the Florida Building Code, as related to the scope section to Florida Product Approval Rule 61G20-3.001.

Limitations and Conditions of Use:

- Diaphragm and axial load capacity is outside the scope of this evaluation.
- Scope of "Limitations and Conditions of Use" for this evaluation: This evaluation report for "Optional Statewide Approval" contains technical documentation, specifications and installation method(s) which include "Limitations and Conditions of Use" throughout the report in accordance with Rule 61G20-3.005. Per Rule 61G20-3.004, the Florida Building Commission is the authority to approve products under "Optional Statewide Approval".
- Option for application outside "Limitations and Conditions of Use"
 Rule 61G20-3.005(1)(e) allows engineering analysis for "project specific approval by the local authorities having jurisdiction in accordance with the alternate methods and materials authorized in the Code". Any modification of the product as evaluated in this report and approved by the Florida Building Commission is outside the scope of this evaluation and will be the responsibility of others.
- This report is a building code product evaluation per FLPE rule (FAC) 61G15-36 to comply with Florida product approval rule (FAC) 61G20-3. This evaluation report is part of the Florida Building Commission approval for the listed code related criteria. This report by James Buckner, P.E. and CBUCK Engineering is not a design certification of code compliance construction submittal documentation, per FBC section 107, for any individual structure, site specific or permit design.
- All metal components and fasteners shall be corrosion resistant in accordance with applicable sections of FBC.
- Design of support system is outside the scope of this report. Support shall be designed by others and shall comply with the FBC Chapters 22 for steel and Chapter 16 for structural loading.
- Fire Classification is outside the scope of Rule 61G20-3, and is therefore not included in this evaluation.
- This evaluation report does not evaluate the use of this product for use in the High Velocity Hurricane Zone code section. (Dade & Broward Counties).

Quality Assurance:

The manufacturer has demonstrated compliance of roof panel products in accordance with the Florida Building Code and Rule 61G20-3.0005 (3) for manufacturing under a quality assurance program audited by an approved quality

Report No.: 20-227-SDeck-S4P-ER

Page 4 of 8

assurance entity through UL, LLC (FBC Organization #: QUA 9625).

Components/Materials (by Manufacturer):

Roof Panel: Berridge "S-Deck or Curved S-Deck"

Material: Steel
Thickness: 24 gauge

Panel Width: 31.5" (max.) Coverage

Rib Height: 7/8" Yield Strength: 40 ksi min.

Steel Grade: 40

Corrosion Resistance: In compliance with FBC Section 1507.4.3:

ASTM A792 coated

Fastener:

<u>FASTENER 1:</u> Panel to Deck Fastener
Type: Hex-Head Screw with WSW

Size : #12 - 14 x 3/4"

Corrosion Resistance: Per FBC Section 1506.6 and 1507.4.4

Standard: Per FBC Section 1506.6

FASTENER 2: Panel to Panel, Stitch Fastener Type: Hex-Head Screw with WSW

Size: #12 - 14 x 1"

Corrosion Resistance: Per FBC Section 1506.6 and 1507.4.4

Standard: Per FBC Section 1506.6

Components/Materials (by Others):

Insulation (Optional):

Type 1:

Type: Rigid Insulation Board

Thickness: 3" (max.)

Properties:

Density: 20 psi min.

Or Compressive Strength: 2.25 pcf (lbs/ft³) min.

Type 2: Compressible Blanket Insulation Thickness: 6" max. before compression

Insulation Notes:

- Rigid Insulation shall meet minimum density OR compressive strength.
- Insulation shall comply with FBC Section 1508. When insulation is incorporated, fastener length shall conform to penetrate thru bottom of support a minimum of 3/4".

Report No.: 20-227-SDeck-S4P-ER

Installation:

Installation Method:

(Refer to "TABLE A" below and drawings at the end of this report.)

Purlin Spacing: Refer to "TABLE A" Below

Fastener spacing: Refer to "TABLE A"
 (along the purlin, in the valley of:
 Method 1: every third corrugation
 Method 2: every other corrugation)

- Sidelap spacing: 12" o.c. (along the length of the side laps)
- Minimum fastener penetration thru bottom of support, 3/4".
 (through flange of steel purlins)

TABLE "A" ALLOWABLE LOADS			
	METHOD 1:	METHOD 2:	
Design Pressure:	- 78.3 PSF	- 190 PSF	
Purlin Spacing:	60" (5'- 0)	30" (2'- 6")	
Fastener Spacing:	8"	5-1/3"	
Side-lap Spacing:	12"	12"	
Span Condition:	3 or more	3 or more	

Notes:

- Allowable design pressure(s) for allowable stress design (ASD).
- Fastener Attachment to Steel Supports May Be Designed By A Qualified Design Professional As Required By The Florida Building Code For Site Specific Projects.
- Diaphragm and axial load capacity are not included in this evaluation.

Install the "S-Deck or Curved S-Deck" roof panel assembly in compliance with the installation method listed in this report and applicable code sections of FBC 7th Edition (2020). The installation method described herein is in accordance with the scope of this evaluation report. Refer to manufacturer's installation instructions as a supplemental guide for attachment.
