Letter of Equivalency – ASTM E108

Date of Issuance: 02/12/2018

Intention - This "Letter of Equivalency" is issued for the purpose to hereby state, and under no uncertain terms, that the standards and methods used for "Fire Tests for Roof Coverings" conducted by the engineers at Intertek testing laboratory for the product 3 IN 1 ROOF, in which, thereafter the Intertek report number: 101831668MID-009, issued on February 9, 2015 that conveys within the "Class A" results for all three test standards;

1. Spread of Flame
2. Intermittent
3. Burning Brand

...was at that time compliant with ASTM E108 for the year 2010 applicable code requirements, and are also the *Equivalent* "Standard Methods for Fire Tests of Roof Coverings" which are applicable to the requirements for the code year 2011.

NUTEK ENGINEERING has based the content for this Letter of Equivalency from information gathered through Intertek Testing Laboratories that the three specific tests, then conducted under ASTM E108, are all identical in methods and practice still conducted to this day.
