

MODEL DESIGNATION:

MAXIMUM OVERALL NOMINAL SIZE:

DESIGN PRESSURE RATING:

USABLE CONFIGURATIONS:

GENERAL DESCRIPTION:

Simonton Series 06-05 Impact Resistant 2-Panel Vinyl Patio Door

Single up to 95" x 80"

Positive: 50.0 PSF
Negative: 50.0 PSF

X0, OX

The head, sill, and side jambs are extruded PVC. The wall thickness through which the anchor screw penetrates is a minimum of 0.070".

- NOTES:
1. This installation has been evaluated for use in locations adhering to the Texas & Florida Building Codes and where pressure requirements as determined by ASCE 7 Minimum Design Loads for Buildings and Other Structures do not exceed the design pressure ratings herein, for use outside the H.V.H.Z.
 2. All interior and exterior perimeter surfaces of the window must be caulked.
 3. Anchor type, size, spacing, and embedment shall be as specified in these drawings.
 4. Anchor embedment to substrate shall be beyond wall dressing or stucco. For concrete/CMU openings embedment shall be beyond wood bucks, if used, and into substrate. Installations to solid concrete or grout-filled CMU may include but do not require 1x wood bucks between product and substrate. Installations to hollow CMU require the use of 1x bucks between product and substrate.
 5. Wood or masonry openings, bucks, and buck fasteners, by others, shall be properly designed and installed to transfer wind loads to the structure. Substrates shall meet the minimum strength requirements as shown in Table 1 & Table 2, this sheet. Concrete or masonry substrates shall not be cracked.
 6. The responsibility for selection of Simonton products to meet any applicable local laws, building codes, ordinances, or other safety requirements rests solely with the architect, building owner, or contractor.
 7. Shims are required where gaps of greater than 1/16" exist between opening and frame. Max. shim stack is 1/4". Shims shall be load-bearing and capable of transferring loads to the substrate.
 8. When used in areas requiring impact protection conforming to missile level C, wind zone 2, this product DOES NOT REQUIRE the use of approved impact resistant shutters or other external protection.
 9. Sealing and flashing by others should be applied using the ASTM E 2112 methodology appropriate for the opening into which the door is being installed. Overall water penetration resistance of the installed product is the responsibility of others.
 10. Glazing shall comply with ASTM E 1300.
 11. For installation to metal substrates, anchors shall be long enough to be fully threaded through the metal thickness with an additional 3/16" min. of threads beyond.
 12. A minimum center-to-center spacing of 3" shall be maintained between all DeWalt Ultracon+ in any direction.
 13. All fasteners penetrating into pressure treated wood shall be capable of preventing corrosion due to reaction with pressure treatment chemicals. Any dissimilar materials that come into contact shall be protected to prevent reactions in accordance with code requirements.
 14. A wind load duration factor Cd = 1.6 was used for the analysis of wood screws only.
 15. Windows shall be constructed as specified in test reports B7596.01-501-47-r1 and B7598.01-501-47-r0 , by Architectural Testing, Inc.
