This evaluation report is provided for State of Florida product approval under Rule 61G20-3. The manufacturer shall notify CREEK Technical Services, LLC of any product changes or quality assurance changes throughout the duration for which this report is valid. This evaluation report does not express nor imply warranty, installation, recommended use, or other product attributes that are not specifically addressed herein.

PRODUCT APPLICATION

Min. Roof Slope:	2:12 or in accordance in with FBC	
------------------	-----------------------------------	--

Application: Deck substrates shall be clean, dry, and free from any irregularities and debris. All fasteners in the deck shall be checked for protrusion and corrected prior to underlayment application. Prior to beginning installation, the underlayment shall be unrolled and allowed to relax for a minimum of 3-5 minutes.

The roof deck shall be constructed of closely fitted plywood sheathing for new or existing construction. Plywood deck shall be installed in accordance with FBC requirements. Roof decks shall have no more than 1/8 gap at abutting joints.

The underlayment shall be installed in accordance with FBC Section 1518.3 with the release backer removed and pressed firmly into place to ensure complete contact with the substrate. The underlayment shall be installed with the roll length parallel to the eave, starting at the eave, and with minimum 3" side laps and minimum 6" end laps staggered 6-ft. from preceding course.

Min. Application40°F; Contact the manufacturer when installing at temperatures below the minimum application
temperature.

GENERAL LIMITATIONS

- 1) This evaluation is only for use in the HVHZ.
- 2) Fire Classification is not within the scope of this evaluation.
- 3) Wind Uplift resistance is not within the scope of this evaluation.
- 4) Installation of the evaluated product shall comply with this report, the FBC, and the manufacturer's published application instructions. Where discrepancies exist between these sources, the more restrictive and FBC compliant installation detail shall prevail.
- 5) The space under the deck area shall be properly ventilated in accordance with the FBC requirements.
- 6) The underlayment may be used as described in other current FBC product approval documents.
- Roof coverings shall not be adhered directly to the underlayment unless otherwise approved in this or other current FBC product approval documents.
- All products listed in this report shall be manufactured under a quality assurance program in compliance with Rule 61G20-3.
