RE: Test Standard Equivalency Statement

Based on my evaluation of the test standards relative to the evaluation reports in the referenced Florida Product Approval:

There are no substantive changes that affect the results of the test. The test findings obtained for the evaluated product assembly are equivalent with the intent and principles of the prescribed standards adopted by the Florida Building Code 9th Edition (2026).

Therefore, the ASTM D3161-16a, UL 580-94, UL 1897-98 & TAS 100-95 standard version used to test the evaluated product assembly is equivalent with the prescribed standards in ASTM D3161-20(2025), UL 580-06, UL 1897-15 & TAS 100-23 adopted by the Florida Building Code 9th Edition (2026).
