Subject: ASTM E1300 Standard Practice for Determining Load Resistance of Glass in Buildings under the Florida Building Code, Building 9th Edition

Dear Mr. Kantola,

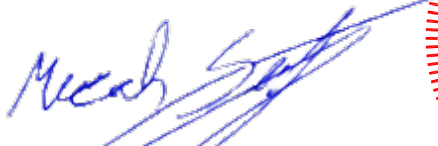

We have reviewed the following test standards and the Florida Building Code, Building 9th Edition and determined that any changes to the standards listed below are an expansion of the test and reporting methods with no changes to the updated test standards that would invalidate any testing done to the previous standard.

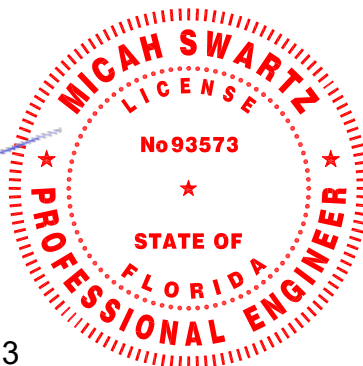

Standards Updated:

- ASTM E1300-04 → ASTM E1300-04E01 → ASTM E1300-07E01 → ASTM E1300-09 → ASTM E1300-09A → ASTM E1300-12 → ASTM E1300-12A → ASTM E1300-12AE01 → ASTM E1300-16 → ASTM E1300-24 – Standard Practice for Determining Load Resistance of Glass in Buildings

Any testing done to the previous standard meets the standards of the Florida Building Code, Building 9th Edition.

Warm Regards,

Micah Swartz, P.E.
Florida License No. PE 93573
