### **Equivalency Evaluation:**

Testing (see above) was conducted to the following standards (as documented in Product Evaluation Report No. 2375.

| <u>Standard</u> | <u>Year</u> |
|-----------------|-------------|
| TAS 201         | 1994        |
| TAS 202         | 1994        |
| TAS 203         | 1994        |

Based upon a review of (a) Chapter 35 of the Current Edition of the Florida Building Codes and (b) Chapter 46 of the Current Edition of the Florida Residential Codes the following is concluded.

- The testing standard revision levels listed above and used for testing of product(s) included in this evaluation have been compared to those currently listed in 8<sup>th</sup> Edition (2023) Florida Test Protocols for High-Velocity Hurricane Zone. Based upon that review, it was determined that the test results documented in the test reports listed above demonstrate code compliance to the Current Edition of the FBC/FRC with regard to testing requirements, results reporting and results interpretation. No changes exist in the listed testing standards that would necessitate re-testing of the product(s) included in this evaluation.

Therefore, all test standards listed above, and test results associated with this product are valid for and demonstrate compliance to the Current Edition of the Florida Building Code and the Current Edition of the Florida Residential Code including the 8<sup>th</sup> Edition (2023) Florida Building Code/Florida Residential Code.
