Tallahassee, FL 32399-2100

Ref: Engineer's Statement of Equivalency

To whom it may concern,

As the design engineer retained to prepare the product approval(s) associated with this letter, the purpose of this letter is to state that some reference standards have changed. For the scope contained within the subject product approval, the requirements of required items within the new reference standard(s), as applicable, are still met:

- **AAMA 501 2015** is no longer applicable, and instead the reference standard(s) is **AAMA 501- 2024 and/or 2025**. A comparison of the older standard with the newer standard shows that they are equivalent, as relevant and applicable.
- **AAMA/WDMA/CSA101/IS2/A440 2008** is no longer applicable, and instead the reference standard(s) is **AAMA/WDMA/CSA101/IS2/A440 2011, 2017, and/or 2022**. A comparison of the older standard with the newer standard shows that they are equivalent, as relevant and applicable.
- **ANSI Z97.1 2014** is no longer applicable, and instead the reference standard(s) is **ANSI Z97.1 2015 (R2020)**. A comparison of the older standard with the newer standard shows that they are equivalent, as relevant and applicable.
- **ASTM E331 2000(2009,2016)** is no longer applicable, and instead the reference standard(s) is **ASTM E331 2023**. A comparison of the older standard with the newer standard shows that they are equivalent, as relevant and applicable.
- **ASTM E1300 2004, 2009, and 2012** is no longer applicable, and instead the reference standard(s) is **ASTM E1300 2016 or 2024**. A comparison of the older standard with the newer standard shows that they are **equivalent with the 2016 version**, as relevant and applicable.
- **ASTM E1996 2014a** is no longer applicable, and instead the reference standard(s) is **ASTM E1996 2017, 2020, and/or 2023**. A comparison of the older standard with the newer standard shows that they are equivalent, as relevant and applicable.

If you have any questions, please feel free to call our office.

Sincerely,

Jalal Farooq, P.E.
