RE: Equivalence of Published and Adopted Versions of AAMA/WDMA/SCA 101/I.S.2/A440

Dear Mr. Bunker:

Product testing conducted in the past may be deemed noncompliant because that testing was performed to a version of the AAMA/WDMA/SCA 101/I.S.2/A440 test method that is not the reference standard of the building code for the jurisdiction evaluating the test results. This issue occurs frequently in the testing and certification industry as there are several building codes or recognized voluntary standards that unfortunately utilize different reference standards.

At hand, this issue is whether testing performed to AAMA/WDMA/SCA 101/I.S.2/A440:22 is equivalent to AAMA/WDMA/SCA 101/I.S.2/A440:17. Upon review of the test standards referenced, all testing methodology within the two standards has remained the same and would not affect the results or validity of Report R0182.01-801-44-R2.

Should you have any questions or require additional information regarding this matter, please contact me.

Sincerely,

INTERTEK-ATI
