

EQUIVALENCE CERTIFICATE

To Whom It May Concern,

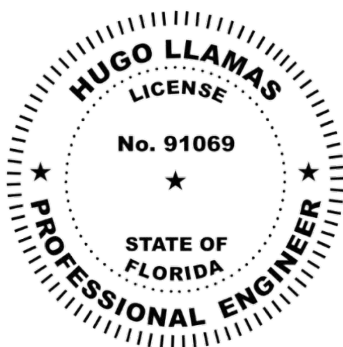

This letter serves to formally establish that the testing procedures and requirements outlined in AAMA 501-24 are fundamentally consistent with those specified in AAMA 501-15, with only minor updates and clarifications introduced in the latest edition.

The 2024 version (AAMA 501-24), published by the Fenestration and Glazing Industry Alliance (FGIA), maintains the same core testing methodologies and performance objectives as the 2015 edition (AAMA 501-15). The updates in AAMA 501-24 primarily include editorial revisions, reorganization for improved clarity, and the inclusion of expanded definitions and guidance to better support uniform test execution and interpretation. These modifications do not materially alter the intent, scope, or performance criteria of the standard.

Therefore, for the purposes of design validation, testing compliance, and project documentation, AAMA 501-24 may be considered equivalent to AAMA 501-15.

Should you require additional technical clarification, please do not hesitate to contact us.

Sincerely,
