RE: Equivalency of Standards, ASTM C1289-18 vs. -25

To Whom It May Concern:

After careful review, it is my professional opinion that the following standards are equivalent in their objective and intent in setting the minimum physical property performance requirements of polyisocyanurate roof insulation.

Codified	Current
ASTM C1289-18	ASTM C1289-25

The primary changes from the codified -18 version to the current -25 version are as follows:

- Establish requirements for Type II, Class 5
- Streamline requirements for Types III, IV, V and VII

This is a building code evaluation.
