Manufacturer: Refrigerated Solutions Group
727 Second Street
Hudson, WI 54016-0248

Code: 8th Edition (2023) Florida Building Code, Building

Product Category: Structural Components

Subcategory: Walk-in Cooler/Freezer

Compliance Method: Rule 61G20-3 Method 1(d), Evaluation Report from a licensed Florida Professional Engineer.

Product Name: Capsule Pak Eco™ System

Description: A self-contained refrigeration system mounted on reinforced walk-in cooler components.

Purpose: This Evaluation Report is issued in accordance with Rule 61G20-3 pertaining to Product Approvals issued by the Florida Building Commission.

Compliance: This self-contained refrigeration system and associated walk-in cooler components have been evaluated and found to be in compliance with the referenced Code and are, for the purpose intended, at least equivalent to that required by the Code.
This Evaluation Report is valid provided there are no changes to the product, quality assurance program, or referenced code. A re-evaluation of the product is required following any code changes in order to maintain its validity.

This item has been digitally signed and sealed by John W. Knezevich PE on the date adjacent to the seal.

Printed copies of this document are not considered signed and sealed and the signature must be verified on any electronic copies.

1. Evidence Submitted:

1.1. Product Evaluation Document:

Knezevich Consulting, LLC Drawing No. KC25-0310, dated August 6, 2025, sheets 1 through 4. The Product Evaluation Document is an integral part of this Evaluation Report.

1.2. Structural Calculations:

Calculations prepared by John W. Knezevich, PE analyze the structural components utilized in the reinforced panels and their connections, as well as the Cap Pak Eco™ system reinforcing to resist applied loads in accordance with FBC Section 1604.

1.3. Quality Assurance

UL LLC – FBC Org. No. QUA9625, Quality Assurance Confirmation letter of 08/18/2025.

2. Wind Load Resistance:

2.1. This self-contained refrigeration system and associated walk-in cooler components are designed to resist wind loads as referenced on the Product Evaluation Documents.

3. Installation:

3.1. Installation, including anchorage to the existing structure, shall be in accordance with the Product Evaluation Document referenced herein.

4. Material Specifications:

4.1. Component materials, anchors, and structural substrates acceptable for use shall be in accordance with the Product Evaluation Documents.

5. Limitations and Conditions of Use:

- 5.1. This is a building code evaluation report. Neither Knezevich Consulting, LLC or John W. Knezevich, PE are the Design Professional of Record for any project on which this Evaluation Report is used for permitting or design guidance unless retained specifically for that purpose.
- 5.2. For specific applications of the system, these Product Evaluation Documents shall be used by a Florida Registered Architect or a Licensed Florida Professional Engineer.
- 5.3. This evaluation is limited to the structural and wind load resistance of the system. The A/E of Record shall address architectural, mechanical, electrical, fire, and waterproofing requirements.
- 5.4. This evaluation report covers uses as detailed in the referenced Product Evaluation Documents. Conditions outside the scope of those documents are not within the scope of this evaluation.
- 5.5. This evaluation report is NOT applicable for installations in the Florida Building Code, High Velocity Hurricane Zone.
- 5.6. This system is designed to be used only with RSG approved cooler systems as referenced in the Product Evaluation Documents.
