Reference Test Report and Drawing:

- Structural Solutions, P.A.* Garage Door Static Pressure Test Report for IRC-6018-120-15 dated 11/02/2020
- Entrematic Drawing number IRC-6018-120-15 dated 10/16/2003

Description of Test Specimen:

18'-0"x7'-0" Model 600, 25 ga steel garage door as shown in drawing IRC-6018-120-15.

Test Standards and Report Conclusion:

The above referenced Test Report states the following:

- The tests were conducted in accordance with ASTM E330 and DASMA 108
- The test was witnessed and certified by Thomas L. Shelmerdine, PE (FL PE# 48579)
- The test facility at Entrematic is accredited by the American Association for Laboratory Accreditation, Certificate #2595.01.

Summary:

The 18'-0"x7'-0" Model 600 as described on drawing IRC-6018-120-15 meets or exceeds the testing criteria as described above. By comparison to the construction of the 18'-0"x7'-0" Model 600, the following doors also meet or exceed the above testing criteria, when constructed in accordance with drawing IRC-6018-120-15:

- 18' x 7' Model 950 doors (which are constructed of thicker 24 gauge steel in lieu of 25 gauge steel)
- 18' x 7' Model 650 doors (which have the "Oak Summit" embossment pattern in the skin)
- Model 600, 650 and 950 doors with widths up to 18'-0" and heights up to 14'-0"
- Short, Long, Flush, and Oak Summit Panels, which are alternate embossment patterns in the skin
- 8 short panel (18-1/8" x 10-5/8") windows (3/32" annealed glass minimum - meets ASTM E1300-04) may be installed in 1 section

To the best of my knowledge, the above garage door conforms to the requirements of the Florida Building Code 7th Edition (2020).
