RE: Equivalence of Testing Standards

Dear Sir (Madam),

Various test standards have been evaluated for differences in test methodology, if any, between tested editions of the test standards listed below and those editions referenced in the current Florida Building Code. The manufacturer has tested their products to the following test standard edition(s):

- ASTM C578-15
- ASTM E119-12
- ASTM E2634-11

Chapter 35 of the Current Florida Building Code references the following editions of the above-mentioned test standards:

- ASTM C578-18
- ASTM E119-18B
- ASTM E2634-18

After review of the above-mentioned referenced standards and editions, it has been found that no significant technical changes have been made to the test standards that would affect the results. All referenced standards have been found to be equivalent. **To the best of my knowledge, the submitted product conforms to the Current Edition of the Florida Building Code.**

Please note that I do not have, nor will I acquire, a financial interest in any company manufacturing or distributing the product(s) for which the reports are being issued.

I also do not have, nor will I acquire, any financial interest with the Laboratory that performed the test(s), or with the Engineer witnessing the test(s) and sealing the test report(s).

Respectfully submitted,

Digitally signed by Hermes F. Norero, P.E.
